icup is a system for packaging and sealing beverages and drinks for safe take-away transportation ensuring their integrity during pick-up and delivery, while also promoting environmental sustainability.

The system consists of a high-quality automatic or semi-automatic fast packaging and sealing machine for cold or hot beverages, drinks, and other suitable products such as candies, nuts, etc. in recyclable empty containers made of 100% aluminum or PET plastic of various sizes, with the ability of custom branding with your business logo and colors.
