Sustainable Beauty, On-The-Go

POWERED BY **coffeeco**

The Power of Upcycled Coffee Ingredients

Our Commitment to Upcycling

At AuraSkin by Coffeeco, we are dedicated to transforming coffee waste into valuable skincare ingredients. Our innovative process turns spent coffee grounds into powerful, effective active ingredients for our products.

Upcycled Coffee Extract

Origin. Derived from spent coffee grounds collected from coffee shops and roasteries.

Benefits. Rich in polyphenols with antioxidant and antiacne properties. It helps to enhance the microflora of the skin and the balance of the skin. Ingredient from coffee grounds is a plant-based extract that acts as a powerful anti-aging agent for mature skin. It is extracted from spent coffee grounds using our proprietary production process. The Sustainable Ingredient from Coffee Grounds is rich in antioxidants, including chlorogenic acid, which has been shown to reduce inflammation and improve skin health.

Sustainability Impact

By upcycling coffee grounds, we significantly reduce waste, lower our carbon footprint, and contribute to a more sustainable skincare industry. Each ingredient not only benefits your skin but also respect our planet.

Clinical Validation

Extensive in vitro and in vivo skin studies, which are GMP & GLP certified, FDA registered and ISO 17025, have demonstrated the efficacy and safety of our upcycled coffee ingredients. The results show improved skin health in the face, body and sculpt area.

Certifications

Our upcycled coffee ingredients are certified for their microbiome friendly and enhancing, anti-acne, and antioxidant properties. They meet high standards of safety and performance as they produced according to GMP ISO 22716 and had been certified as dermatological tested in final products.

Documentation and certification

- In vivo microbiological microbiome study
- Quorum quenching analysis
- In vitro microbiome friendly analysis
- Cosmos approved certification
- V-Label certification
- Toxicological analysis

Skin Microbiome Enhancement

At AuraSkin, we don't just focus on surface-level beauty – we go deeper.

Enhancing the skin's microbiome is crucial for maintaining healthy, balanced skin. A balanced microbiome helps protect against harmful bacteria and inflammation, leading to clearer, more radiant skin.

Our products are formulated with natural ingredients that nourish and support the skin's microbiome, promoting long-term health and vitality.

With AuraSkin, you can trust that your skincare routine is not only effective but also beneficial for your skin's overall well-being.

Our products are formulated to support the skin's microbiome, maintaining a healthy balance of beneficial bacteria. This promotes overall skin health, reduces the risk of irritation and enhances the skin's natural defenses.

auraskin

Lip Balm

Lip Balm 4.5g

Features

- Infused with upcycled coffee extract to provide deep hydration and nourishment.
